- **MEALS SHARING APP**

DESIGNING AND DEVELOPMENT

HackYourFuture(2020)

*Technology used : React, Node, Mysql, HTML, CSS, Javascript*

CRM, Telecom, Project Management Portal and E-Commerce.

I am a Frontend developer having worked with multinational clients for the last 6+ years. I am a niche combination of a frontend developer and web / Graphics designer. I will describe myself as a full package which is required to develop an app from a conceptual level to a real and functional app. To top up the development skills, I am highly proficient in Photoshop, Illustrator, Figma. Using these skills I can build websites from the ground up, quickly and with little or no external support. Just recently, I have created a single page app in react in just three days for a local Danish business WINTA (<https://winta.netlify.app/>). I can work in both waterfall and agile delivery model. I am a curious individual by nature and able to adapt to different working environments as per the project need

## KEY SKILLS

REACTJS

\* \* \* \* \*

The purpose of this project to mock an app in which one can share their prepared meals. Meals sharing app is a functioning project. In which one can do reservation for meals. Owner can add edit and create meals. This app shows basic CRUD functionality.

## EXPERIENCE

### LETSGO

SEPT 2017 - FEB 2018

#### WEB DEVELOPER / CREATIVE DESIGNER

I worked in here as a UI/UX designer and developer. Here i worked on various small projects as well solely and in team. I worked on the Letsgo car sharing booking system, which allows people to book their cars online. I worked on their mobile app for car sharing as well. My work responsibilities there was making wireframes, Designing pages, Style guides, Icons, logo's, Brochures, Web templates, and front-end development. Below are the links for Letsgo mobile app.

For Android devices : [Letsgofleetsystems](#)

For IOS devices : [letsgofleetsystems](#)

### DTSC TECHNOLOGY

SEP 2014 - DEC 2016

#### WEB DEVELOPER / DESIGNER

I worked on various small and intermediate projects there. I also worked on the ATS (Applicant Tracking system) which was a product on the tracking system of jobs applicants. My work responsibilities there was making wireframes, Designing pages, Style guides, user flow's, Icons, logo's, Brochures, Web templates, and front-end development with PHP, ecommerce like **wordpress** and **magento**.

### HCENTIVE

APRIL 2014 - AUG 2014

#### UI/UX DESIGNER

I worked there majorly on the project which was WFM (**Webensure Financial Management**). This product was on the health policies. My work responsibilities there were making wireframes, Designing pages, Style guides, Icons etc. I also worked on the development of the first draft of their mobile app.

### UDAAN TECHNOLOGIES

JAN 2013 - APRIL 2014

#### WEB DEVELOPER / DESIGNER/UI /UX
